

Soft Vinyl Window Cleaning Instructions

With proper care and cleaning, your soft vinyl inserts will give you years of trouble-free service. The vinyl is a strong, resilient material specially formulated to resist deterioration from the sun's ultra-violet rays. However, they must be properly cleaned and maintained. Please clean vinyl at least twice a year.

WARNING! All vinyl sliding panels can be punctured or cut with a sharp object. Remove rings, bracelets and watches when washing. Do not use any alcohol or ammonia based products or dishwashing detergents/soaps, as they can harm vinyl. Do not use any harsh cleaners or detergents. It is imperative that no formulas containing bleach are used, including professional pressure cleaners.

Follow cleaning recommendations below.

TAKING CARE OF YOUR VINYL WINDBREAKERS:

Vinyl is not glass and should not be treated as you would treat glass. Extreme care must be taken when cleaning your vinyl windbreakers. For the best results, your windbreakers need to be cool before washing. Make sure all dust and loose sand or grit has been removed from all areas of the frame. This is best accomplished with the soft brush attachment of your vacuum cleaner.

We recommend that you use our vinyl cleaner which has been specially formulated for our vinyl windbreakers or Woolite reduced with water in accordance with the instructions on the Woolite bottle.

You may purchase Soft Vinyl Cleaner from DC Enclosures, Inc. 770-514-7019
